Profile Summary

Result-driven **Computer Science Engineering student (Batch 2026)** passionate about building scalable and data-driven systems. Skilled in Python, SQL, React.js, Node.js, and data pipeline development with a solid understanding of cloud technologies and analytics. Experienced in designing end-to-end solutions with strong analytical and problem-solving abilities with a focus on innovation, collaboration, and continuous learning. Adept at applying agile methodologies and modern engineering practices to deliver high-quality, AI-driven digital solutions.

Education

B.Tech in Computer Science and Engineering (CGPA: 7.46 / 10) Nov 2022 – Present

Institute of Technical Education and Research (SOA University), Bhubaneswar

Technical Skills

Languages: Python, Java, SQL, JavaScript, C

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Technologies: Java (Core), Node.js, Express.js, RESTful APIs

Cloud: Google Cloud (BigQuery, Cloud Storage – basics)

Databases: MySQL, PostgreSQL, MongoDB

Data Engineering: ETL Pipelines, Batch Processing, Pandas, NumPy, Data Cleaning, PySpark (basic)

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, SDLC, Agile Methodology

Soft Skills: Problem Solving, Logical Thinking, Communication, Team Collaboration

Professional Experience

Full-Stack Developer Intern, Attractify Technologies (IIT Bhubaneswar) May 2025 – Sep 2025

- Built and optimized scalable front-end modules using React + TypeScript, improving responsiveness by 30%.
- Integrated RESTful APIs and managed state using Redux and Context API
- Collaborated in Agile sprints, performing unit testing and version control via Git.
- Assisted in testing, debugging, and documentation to ensure high-quality deliverables.

Software Developer Intern, EvoqueSys, Bhubaneswar Sep 2023 – Mar 2024

- Developed full-stack features using React.js, Node.js, SQL, focusing on scalability and clean architecture.
- Enhanced API logic, reduced response latency, and contributed to CI/CD pipeline setup.
- Collaborated with cross-functional teams to deliver iterative releases in Agile environment.

Coordinator, SOA Flying Community – ITER Bhubaneswar June 2024 – Present

- Led workshops and technical sessions, demonstrating leadership and relationship-building skills.
- Coordinated planning and execution of technical events and innovation initiatives.

Campus Ambassador, Glow Logics June 2023 – Present

- Promoted Glow Logics on campus through marketing campaigns.
- Organized events and workshops to increase brand engagement.
- Built relationships with peers and faculty to drive brand recognition.

Key Projects

NLP-Based Cybercrime Reporting System (Python, AI/ML)

- Developed a text classification system achieving **97% accuracy**.
- Performed data preprocessing, feature extraction, and model evaluation.
- Demonstrated strong problem-solving and analytical skills through research-driven development.

Fake News Detection System (Python, TensorFlow, NLP)

- Developed a deep learning model combining GloVe embeddings, CNN, and LSTM to classify fake vs real news.
- Implemented end-to-end NLP pipeline including preprocessing, feature extraction, and model evaluation.
- Achieved high classification accuracy with strong Precision, Recall, and F1-score on real-world news data.

Healthcare Prediction Analyzer (python, Data Analytics)

- Designed a data analytics pipeline for patient data prediction and storage
- Integrated backend APIs for real-time analysis; achieved 85% accuracy in prediction results.
- Integrated frontend and backend for real-time visualization and faster decision-making.

House Price Prediction System (Python, Machine Learning)

- Developed a regression-based machine learning model to predict house prices using structured real estate data.
- Performed data cleaning, feature engineering, and exploratory data analysis with Pandas and NumPy.
- Trained and evaluated models using metrics like RMSE and RZ to improve prediction accuracy.
- Built an end-to-end pipeline from raw data preprocessing to final price prediction output.

Achievements

- **Runner-Up, Smart India Hackathon 2024** – Developed a technology-driven social impact solution.
- **Research Publication:** "CYBERGUARD – NLP-based Cybercrime Reporting," Journal of Xidian University.
- Presenter – Ideation by Startup Odisha, OUTR Bhubaneswar.

Certifications

- Oracle Cloud Infrastructure Generative AI Professional – Oracle
- Oracle Cloud Infrastructure AI Foundations Associate – Oracle
- Data Analytics Certification – Deloitte
- Python (Basic) – HackerRank
- Project Management Certification – Accenture
- Enterprise Design Thinking – IBM
- UI/UX Designing – Great Learning
